Your next adventure starts here.

Discover places. Build your days. Share the journey.

PLAN Set your destination, dates, budget and travel preferences.	**DISCOVER** Explore attractions and places on an interactive map.
ORGANIZE Assign places to days and schedule visit times and durations.	**SHARE** Save your itinerary, share a public link or export a PDF.

USER GUIDE + PRODUCT FEATURES

A practical introduction to using TripGenie, from your first trip idea to a shareable itinerary.

Welcome to TripGenie

TripGenie is a travel-planning experience designed to help turn a destination idea into an organized trip plan. Start with the essentials, discover attractions, arrange activities by day, and keep or share the itinerary.

What you can do

FEATURE	HOW IT HELPS
Trip planning form	Enter a destination, travel dates, number of travelers, budget, currency, preferred pace and interests.
Attraction discovery	Explore attractions returned for your destination and view them on an interactive map.
Day-wise itinerary	Collect places and assign them to the days of your trip.
Visit scheduling	Choose a visit time and duration for each activity. The planner can flag schedule conflicts and missing details.
Trip saving	Save an itinerary and reopen it from My Trips in the same browser.
Public sharing	Create a shareable public itinerary link so others can view the trip.
PDF export	Print or save an itinerary as a PDF for offline reference.

Good to know: TripGenie helps organize your plans. Always verify opening hours, ticket requirements, local travel conditions and reservations directly with the relevant provider before you go.

1. Create your trip

Start on the TripGenie planner page. The trip form gathers the information needed to shape your itinerary.

1. **Choose a destination**
   Enter the city, region or destination you want to explore.
2. **Set your dates**
   Choose a start date and end date. The planner displays the trip duration.
3. **Add trip details**
   Select the number of travelers, enter your total budget and choose the currency.
4. **Choose your interests**
   Select themes such as Nature, Food, Culture, Adventure, Beaches or Nightlife.
5. **Select your pace**
   Choose a relaxed, balanced or activity-packed travel pace.
6. **Generate your trip**
   Submit the form to move into the itinerary-planning experience.

Planning tip

Use realistic dates and a budget that reflects the whole trip. Choose interests that genuinely matter to your group.

2. Discover attractions

Use the attractions experience to explore places that may be worth adding to your trip.

- **Explore on the map:** Understand where attractions are located.
- **Review place details:** Check the attraction name, category and address where available.
- **Build your collection:** Add places you want to consider for your itinerary.
- **Remove choices:** Remove attractions from your collection if your plans change.

Important: Attraction information and availability can change. Confirm details with the attraction or its official source before visiting.

3. Build a day-wise itinerary

Once you have selected attractions, organize them into the days of your trip. The day-wise planner helps turn a list of places into a practical schedule.

• **Choose a day:** Assign each selected attraction to the day you plan to visit it.

• **Move activities:** Change an activity's assigned day when your plans change.

• **Remove an assignment:** Remove a place from a day without necessarily removing it from your selected-attractions collection.

• **Review each day:** Switch between day tabs to check the plan for the full trip.

4. Schedule visit times and durations

For each assigned activity, set a planned visit time and an estimated duration. TripGenie can display the calculated end time and help identify scheduling issues.

CONTROL	PURPOSE
Visit time	Set the planned start time for an activity.
Visit duration	Estimate how long you expect to spend at the attraction.
Move to	Reassign the activity to another trip day.
Conflict feedback	Review warnings when activities overlap or do not leave the configured buffer.
Schedule summary	Review scheduled activities, sightseeing time, buffer allowance and remaining free time.

Scheduling advice: Leave time between activities for transport, meals, queues and unexpected delays. Schedule checks are planning aids, not a guarantee that a route is feasible.

5. Understand the daily summary

• **Scheduled activities:** Activities with a visit time and duration.

• **Sightseeing time:** The combined planned duration of scheduled visits.

• **Buffer allowance:** Time reserved between activities according to the planner's configured rule.

• **Remaining free time:** An estimate based on the planner's daily planning window.

Treat these numbers as estimates. Actual travel times and visit durations may differ.

6. Save and revisit your trips

Use **Save Itinerary** to store your current plan. Open **My Trips** to see saved trip cards, revisit an itinerary or delete a saved trip.

Current saving behavior

Saved trips are stored in the browser's local storage in the current implementation. They are associated with the browser and device where you saved them; they are not automatically synchronized across different devices or browsers. Clearing browser data may remove locally saved trips.

7. Share a trip with others

Use **Share Trip** from a saved trip to create a public link. Copy the link and send it to friends, family or travel companions. Anyone with the link may be able to view the shared itinerary, so avoid including private or sensitive information.

If sharing fails

• Check that the app is online and try again.

• If the problem continues, the service may be unable to connect to its database. Try again later.

8. Export an itinerary as PDF

Use **Export Itinerary as PDF** on your itinerary page, or the PDF download option on a shared itinerary page. In the browser print dialog, choose **Save as PDF** to keep a copy or print it.

A PDF is useful for offline reference, sharing with a group or keeping a copy of your planned day-wise schedule. Check the exported document before travelling in case you need to update any details.

9. Use TripGenie on a phone

• Tap the hamburger menu (three horizontal lines) to open the navigation drawer.

• Use the close icon or tap outside the drawer to close it.

• Scroll through itinerary cards and day tabs to review your plan.

• Use the mobile layout controls to assign days and adjust visit details.

For the best experience, use an up-to-date mobile browser and a stable internet connection when searching for attractions or sharing trips.

10. Frequently asked questions

Can I edit a saved trip?

Yes. Open the trip from My Trips, make your changes and save the itinerary again.

Can I plan multiple trips to the same destination?

Yes. Trips with different dates can be saved as separate itineraries.

Does saving automatically sync between my phone and laptop?

No. The current My Trips feature stores saved trips in the browser's local storage.

Can I share a trip publicly?

Yes. Share Trip creates a public link for viewing the itinerary. Share the link only with people you intend to have access.

Does the schedule guarantee that I can visit every place in time?

No. Schedule summaries and conflict checks are planning aids. Verify travel times, opening hours and real-world constraints.

Can I use the PDF offline?

Yes. Once saved to your device, the PDF can be opened without an internet connection.

A few things to remember

- TripGenie helps you plan; it does not make reservations or purchase attraction tickets on your behalf.
- Confirm opening hours, admission rules, prices, safety guidance and transport options directly with providers.
- Public share links should be treated as viewable by anyone who obtains the link.
- Keep a separate copy of important travel documents and booking confirmations.

Ready for your next adventure?

Open TripGenie, choose a destination and start shaping a trip that works for you.
